AMENDMENTS TO THE CLAIMS

A detailed listing of all claims that are, or were, in the present application, irrespective of whether the claim(s) remains under examination in the application are presented below. The claims are presented in ascending order and each includes one status identifier. Those claims not cancelled or withdrawn but amended by the current amendment utilize the following notations for amendment: 1. deleted matter is shown by strikethrough for six or more characters and double brackets for five or less characters; and 2. added matter is shown by underlining.

1. (Currently Amended) A method for executing an RPC (Remote Procedure Call) over HTTP from a Web page within [[the]] an application window at a client device, the method comprising:

containing, in the application window of [[a]] the client device, at least one Web page;

transmitting, to a server, an HTTP request initiated by a first HTML element embedded in a main window of the at least one Web page, said first HTML element including a URL;

invoking, at a server, a procedure or a set of program code identified by the URL of said first HTML element;

receiving, at [[said]]a Web browser from said server in the transmitting action, output of said procedure or program code in the invoking action into a second HTML <script> element.

2. (Original) A method as defined in claim 1, wherein said application window is a Web browser window.

2

3.     (Original) A method as defined in claim 2, said first HTML element in the transmitting action and said second HTML element in the receiving action are contained within the same Web page.

4.     (Currently Amended) A method as defined in claim 2, said first HTML element in the transmitting action and said second HTML element in the receiving action are contained within different Web pages, at least one of which is hosted by a different server.

5.     (Currently Amended) A method as defined in ~~claims 3 and 4~~ claim 1, wherein said first HTML element in the transmitting action is an HTML <script> element.

6.     (Original) A method as defined in claim 5, wherein said first HTML element in the transmitting action is the same as the second HTML <script> element in the receiving action.

7.     (Currently Amended) A method as defined in ~~claims 3 and 4~~ claim 1, wherein said first HTML element in the transmitting action is an HTML <img> element.

8.     (Currently Amended) A method as defined in ~~claims 3 and 4~~ claim 1, wherein said first HTML element in the transmitting action is an HTML <embed> element.
